Lynns Concepts Limited

Lynns Concepts has been in the ceramic industry for 45 years. From being one of the first exporters of porcelain dinnerware to a master in ceramic production, it has grown alongside Hong Kong and the Chinese mainland over the years. It seeks to improve the quality of China exports, with the mission of redefining “China made”. Lynns Concepts is increasing its capacity by opening more production facilities, adding drinking glasses, home decorative and hotelware to its established lines of porcelain, bone china, stoneware, terracotta and earthenware.
