Tang's Wildlife Design Company

Tang's Wildlife turns carved wood into masterpiece sculpture. Chief designer Simon Tang notes that creating art is not just a business, but also a journey through the imagination, from an inspired idea to the expression of perfect beauty. Under the supervision of designer Helen Cheung, 200 skilled artists carry the same vision. They meticulously hand-cast and hand-paint all products. For the past 12 years, Tang's Wildlife continues to strive to make the best quality, wildlife-inspired sculpture, and strive for excellence in all areas.
